SUMMARY

Data analyst with a First Class BSc in Data Science and Business Analytics from the University of London under LSE academic direction and a Master of Communication in Data and Communication from the National University of Singapore, bilingual in English and Bahasa Indonesia. Brings two years of fintech and banking experience analysing data on 10,000+ merchants and 200,000 high-net-worth customers, building KPI dashboards and alerts that inform pricing, product, and partnership decisions.

CORE SKILLS

Querying & Programming: SQL (PostgreSQL, MySQL, BigQuery), Python (pandas, scikit-learn), R, SPSS, Git/GitHub

BI & Visualisation: Tableau, Power BI, Looker Studio, Google Sheets, Lark dashboards

Excel & Office: Advanced Excel (Power Query, XLOOKUP, dynamic arrays, Pivot Tables), PowerPoint, Word

Analytics: Data cleaning, KPI reporting, funnel and cohort analysis, RFM segmentation, ETL automation, data migration

Languages: English (fluent), Bahasa Indonesia (native)

PROFESSIONAL EXPERIENCE

KPay Merchant Service (Singapore) Pte. Ltd.

Sep 2025 - Mar 2026

Data Analyst Intern

Singapore

- Shaped merchant programme strategy for the Director of Revenue Operations and project managers by evaluating programme performance across 10,000+ merchants with SQL and Python.
- Contributed to ~21% average GPV growth and a higher net take rate across merchant segments by analysing merchant profitability and acquirer-level performance to guide routing and pricing.
- Improved visibility of merchant performance, product adoption, and the lead-to-signing pipeline for sales and management by building a suite of Lark dashboards fed by Zapier from WATI.
- Eliminated a manual weekly review by automating GPV monitoring for 500+ target merchants in Google Apps Script and Google Sheets, with threshold alerts flagging at-risk accounts.
- Kept merchant records consistent through a platform data migration by standardising naming across source systems with Python fuzzy matching.

PT Bank Central Asia Tbk (BCA)

Dec 2023 - Jul 2025

Partnership & Benefits Analyst | Individual Customer Business Division

Jakarta, Indonesia

- Shaped the proposition for a new ultra-high-net-worth tier by profiling 200,000 high-net-worth customers' demographics, spending, and behaviour from data warehouse extracts in Power BI and Excel.
- Identified a ~10% average YoY sales uplift across 20+ merchant partners by analysing transaction data in Excel and Power BI and delivering partner performance insights.
- Established the first centralised record of premier banking benefit usage by implementing an OutSystems tracking application that replaced manual logs across the customer service team.
- Strengthened relationships with high-net-worth customers by organising exclusive client events, including an economic forum for 300+ guests alongside BCA's senior leadership.

PROJECTS

- Customer Retention Analytics | SQL, Python, Tableau:** Surfaced a 6 to 10 month churn window across 1.07M transactions using RFM segmentation in PostgreSQL (CTEs, window functions) and cohort analysis in Tableau.
- Flight Delay Analysis & Prediction | Python, scikit-learn:** Predicted flight delays with R^2 0.975 using Random Forest, the best of four benchmarked models, after cleaning 11.7M US flight records to find lowest-delay travel windows.

EDUCATION

National University of Singapore

Aug 2025 - Jun 2026

Master of Communication, Data and Communication Specialisation | GPA: 4.6 / 5.0

Singapore

University of London, academic direction from the London School of Economics (LSE)

Oct 2020 - Aug 2023

BSc Data Science and Business Analytics, First Class Honours | Studied at SIM

Singapore

- Achiever's Award recipient (2021); Distinction in the CHESS programme.

CERTIFICATIONS & TECHNICAL TRAINING

Business Intelligence Bootcamp · Dibimbing.id (online bootcamp)

Dec 2024 - Jun 2025

- Hands-on training in Python, SQL, Tableau, and Power BI, from data cleaning to dashboard delivery.

Data Science Bootcamp · Rakamin Academy (online bootcamp)

Jul 2022 - Nov 2022

- Python and SQL fundamentals; analysed e-commerce business performance using SQL.
